

NUCLEAR INDUSTRY

Databases for meeting nuclear challenges

- Data on 95% of the most common materials used in building, designing and maintaining nuclear power plants
- Corrosion, fatigue, and fracture data for alloys used in cooling and other assemblies
- Performance and degradation of properties and microstructure in nuclear environments
- Continually updated information on the newly-approved high performance alloys

**DATA
IS IN

PRODUCTS

Aerospace and High Performance Alloys Database (AHAD)

Mechanical properties of over 340 High Performance Alloys organized in chapters written by experts in the alloys

Aerospace Structural Metals Database (ASMD)

Mechanical properties of over 300 Alloys used in aerospace organized in chapters written by experts in the alloys

Cryogenic and Low Temperatures Database (CLTD)

Thermophysical, mechanical, electrical and other properties of over 2100 materials in the temperature range from 0K to 273K

Thermophysical Properties of Matter Database (TPMD)

Thermophysical and thermoradiative properties of over 5000 materials

Microelectronic and Composite Materials Database (MCMD)

Our newest product introduced in 2022 contains everything in the MPMD (over 1200 materials) plus much new data on more than 200 composite materials, including ceramic matrix composites, both particulate and whisker reinforced as well as GLARE materials (GLASS-REINFORCED FIBER METAL LAMINATE).
